

## Table Talk

Often overlooked, the appearance of your reception seating and tabletop is as important as your appearance on your special day. Your wedding is about creating an ambience that reflects your personal style. What better way to bring your own style elements to eye level than with an inspired design for your reception table? After all, the table is where your guests will spend the majority of their time at your wedding. Blackstone has consulted with the top trend setters in wedding style this season to highlight some of the hottest trends in tabletop décor, exclusively for Blackstone Brides.

### Dining In Style

Don't be afraid to experiment with Shape, Color, Detailing and Textile. Your Blackstone Designed Menu isn't standard fare, so get inspired and look for unique detailing and color in your tableware, such as delicate patterns on the rim of the plate. And don't be afraid to experiment with shape—think triangular, rectangular or square. Individual is the word in presentation, ask your Blackstone planner about food items served in miniature mugs, small bowls, or glasses.
